Join a Research Study:

Neurodegeneration-Associated Psychiatric Syndromes

(Principal Investigator: Edward Huey, M.D.)

About the research

- Seeking participants for an observational research study **looking at how dementias** (like Alzheimer's disease) can affect mood and behavior
  - Participation involves coming in with a study partner (someone who knows you well) for **one voluntary, 4-5 hour visit** to answer questions about recent mood and emotions and complete an MRI scan
  - Participants will be compensated $50-$100

Who can participate?

- This study is **recruiting participants with dementia**, including:
  - People who have been diagnosed with Alzheimer's disease
  - Who are between 40-90 years old,
  - And who speak English or Spanish.

How do I participate?

- If you are interested in becoming involved in this study or learning more, please contact the research team at **(212) 305-3187** or **HueyResearchTeam@cumc.columbia.edu**
